## Catalysts

Pre-lesson assignment- textbook page 147-149

## Define the following terms

- Catalyst
- Adsorption
- Desorption
- Intermediate

## Make notes on catalysts

Use the following questions as guidance

- 1. Explain how a homogeneous catalyst works:
  - a. Explain the term 'homogeneous'
  - b. Explain the process that leads to the reduction of activation energy.
- 2. Explain how a heterogeneous catalyst works:
  - a. Explain the term 'heterogeneous'
  - b. Explain the process that leads to the reduction of activation energy.
- 3. Explain how catalysts make chemical processes more sustainable.
