

Y12 – Enthalpy Changes Checklist

Stick this checklist into your yellow book at the beginning of the topic. Tick off the topics as you cover them.		
In this module you are expected to be able to...	In Notes	Revised
- Outline the history of the periodic table - Give electron configuration across a period and link electron configuration to block letter on the periodic table. - Explain the general trend in ionisation energy across a period and down a group. - Explain the exceptions in the general trends.		
- Define Periodicity - Explain the structure of the periodic table.		
- Explain the trend in reactivity down group 2 in terms of ionisation energies. - Describe the reactions and the trend in reactivity between group 2 metals and O₂, H₂O and dilute acids and write redox reaction equations for each.		
- Describe the trend in how reaction of group 2 oxides with water can form hydroxides including expected pH values - Link this idea to the uses of Gp 2 compounds as bases in: - neutralising soils e.g. Ca(OH)₂, including equations - Antacids e.g. Mg(OH)₂ and CaCO₃, including equations		
- Determine the bonding in X₂ and describe the properties of halogens, including reactivity and colour. - Describe the reactions of halogens in terms of reduction and oxidation. - Write ionic equations for the displacement reactions of halogens. - Explain the trend in reactivity in terms of atomic structure.		
- Define disproportionation - Describe the reaction of chlorine with water and give a use of this reaction. - Describe the reaction of chlorine with cold, dilute NaOH(aq) and give a use of this reaction.		
Describe a test for halide ions, and give an ionic equation for the reaction.		
- Give tests and positive results for - Carbonates - Sulfates - Halides - Explain the importance of the order these tests are done in. - Describe the test for ammonium ions.		

Pre-test Evaluation

I have...	
Updated my yellow book notes	
Ensured I understand all of my notes	
Looked on the open drive for additional work	
Asked my teacher for guidance	
Confidence rating	I’m doomed! -- - = + ++ I am the BOSS!
